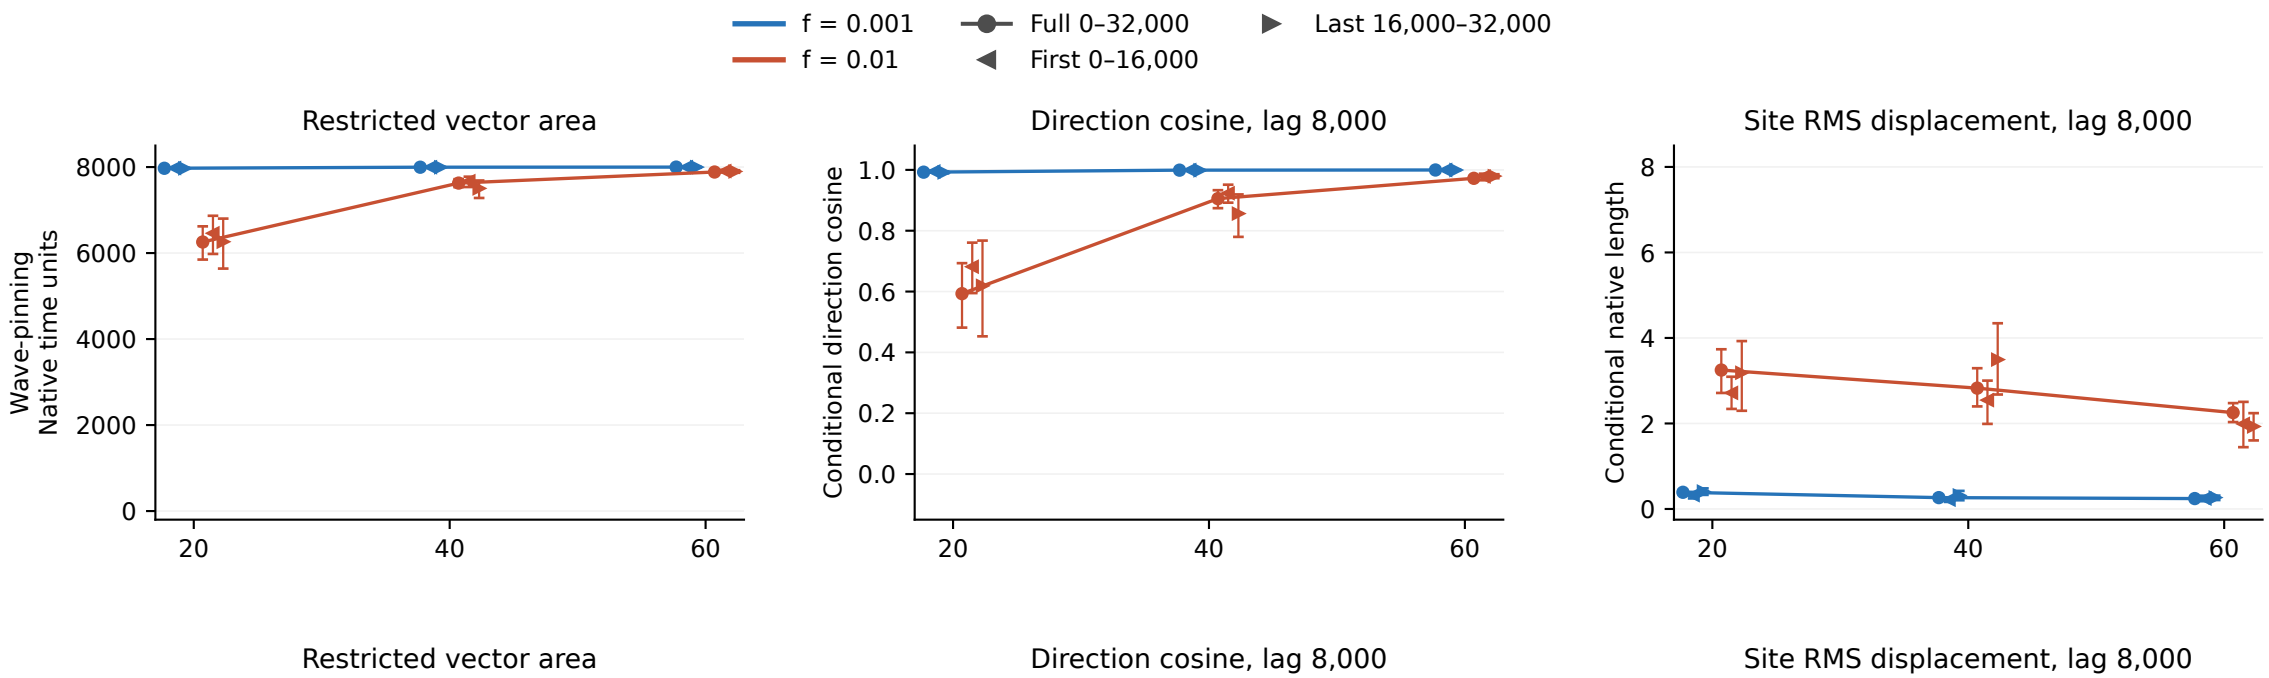
# Full and half-window diagnostics retain ongoing adaptation

Same maximum lag 8,000 in every window; no selected burn-in or selected seeds



**The major restricted-area ordering survives both halves. This agreement does not establish stationarity.**

Physical motion needs a narrower claim: high-input Wave-pinning last-half RMS is 3.19 / 3.49 / 1.93 at C20 / C40 / C60.

Holmes C60 high-input direction cosine shifts from 0.798 in the first half to 0.670 in the last; large-ring site coverage remains conditional.
