Complete endpoint context at t = 14000, with the three Holmes histories highlighted
Wave-pinning
Goryachev
Holmes 3
Circumference (native units)
Realized shorter-route fraction
① Holmes C30 d12: cue-associated single peak
② Holmes C40 d12: merged / bridged region
③ Holmes C40 d16: two distinct sites
Circled cells use exact native h = 0.05 histories. Endpoint labels are descriptive geographic associations, not stable-branch or tracked-fate classifications.
Single peak near old; identity unresolved
Cue-associated peak
Distinct old + cue peaks
One region spans old + cue
Shifted / merged; unresolved
No resolved peak
Ambiguous multiple peaks
Cue/core overlap excluded
Holmes C80 unavailable
