Finite competition distinguishes cue-on activity from retained local organization
Fixed endpoint support 3 (Spring 0.2), unchanged native peaks, all 97 qualified sizes; 13 preparation-ineligible sizes retained in data.
Shared scales within each row. First moments do not uniquely identify a site, protrusion or cell movement.
Wave-pinning
n = 20; cue 1000 native units
Goryachev
n = 21; cue 1000 native units
deBelly
n = 12; cue 1000 native units
Holmes 3
n = 23; cue 1000 native units
Spring
n = 21; cue 50 native units
