Complete-grid deterministic activity moments after 13000 cue-free units

Wave-pinning: endpoint R

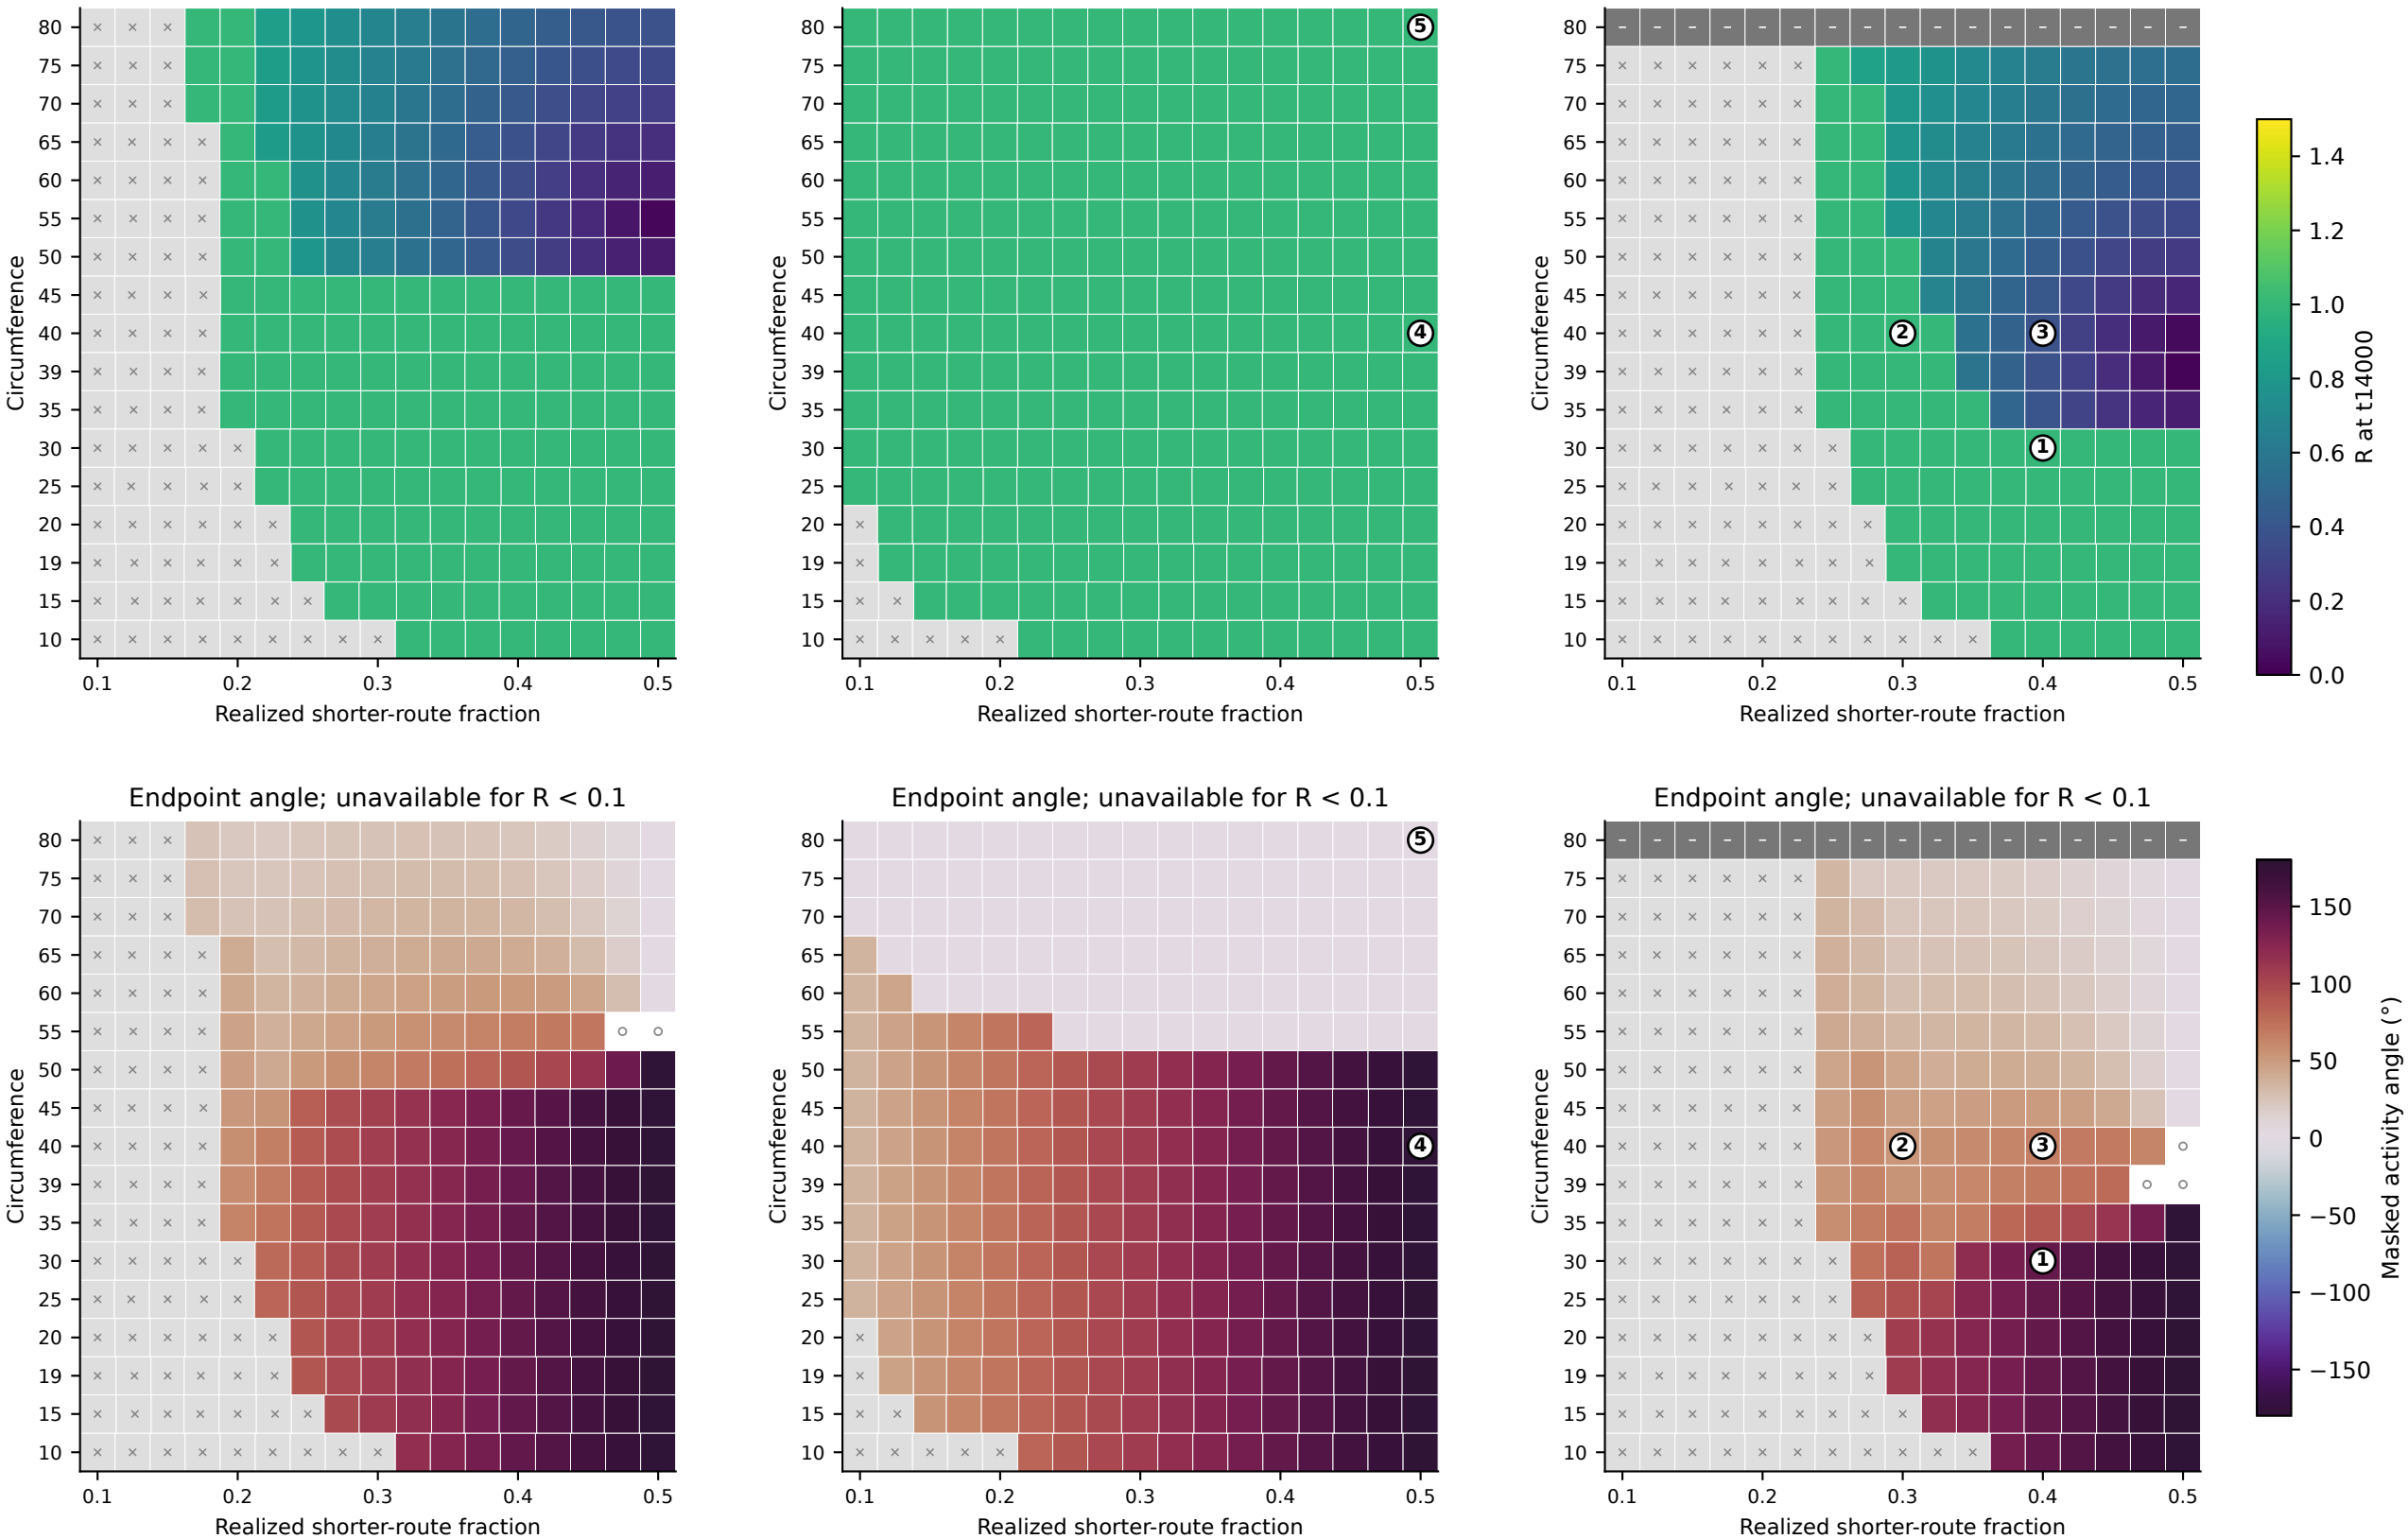

Goryachev: endpoint R

Holmes 3: endpoint R

Endpoint angle; unavailable for R < 0.1

Endpoint angle; unavailable for R < 0.1

Endpoint angle; unavailable for R < 0.1

Circled1–3: same three Holmes histories;4–5: Goryachev C40d20/C80d40. White open circle: angle masked by low magnitude; gray×: excluded; darkgray: unavailable.
R is normalized to the initial first moment, not total activity. RawM_0,q_1,q_2 and sensitivity gatesR=.05/.2 are retained. Finite readout does not imply universal settling.
